

Recording and sorting system for
Drysorting, Greensorting and Planing lines

Xylon

Nolyx offers up to date technics, a user-friendly HMI interface with a flexible system for small as well as large lines. Our support is our strongest trademark, and we take the overall responsibility.

Xylon includes one supplier for machine control and sorting, we create package files for office systems, import of Run orders and Sort table, communication with office system, measuring of deceleration time, input of article register, production measuring, handling of run order, recipe handling, report handling and sort guarding.

Measuring and Crosscutting

Within measuring and crosscutting Xylon provide wane measuring device, thick measuring, module crosscutting, convex measuring, exact crosscutting, length measuring, width measuring, free crosscutting and trimmer control.

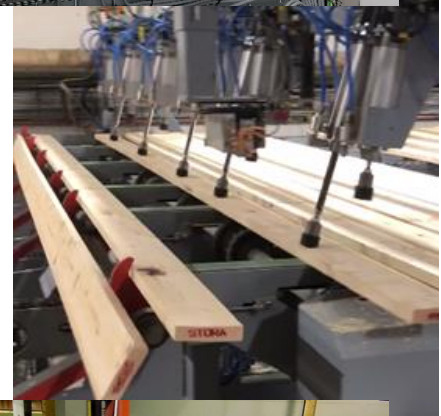

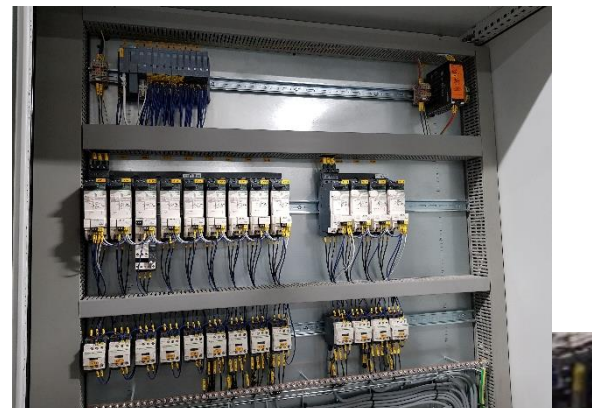

Flexible handling of emptying

With Xylon the possibility to automatically or manually merge small packages, simply handle editing and handle sort change exist.

Automatic Package information

Automatic package information involves package queue from sorting information to the stacker, press/strapping, wrapping and bolster.
